

**Determina quale numero completa correttamente entrambe le operazioni**

Es)  $9 : 1 = \underline{\quad}$   
 $\underline{\quad} \times 1 = 9$

1)  $42 : 7 = \underline{\quad}$   
 $\underline{\quad} \times 7 = 42$

2)  $35 : 5 = \underline{\quad}$   
 $\underline{\quad} \times 5 = 35$

3)  $63 : 7 = \underline{\quad}$   
 $\underline{\quad} \times 7 = 63$

4)  $12 : 2 = \underline{\quad}$   
 $\underline{\quad} \times 2 = 12$

5)  $10 : 2 = \underline{\quad}$   
 $\underline{\quad} \times 2 = 10$

6)  $3 : 1 = \underline{\quad}$   
 $\underline{\quad} \times 1 = 3$

7)  $48 : 6 = \underline{\quad}$   
 $\underline{\quad} \times 6 = 48$

8)  $24 : 8 = \underline{\quad}$   
 $\underline{\quad} \times 8 = 24$

9)  $30 : 6 = \underline{\quad}$   
 $\underline{\quad} \times 6 = 30$

10)  $56 : 7 = \underline{\quad}$   
 $\underline{\quad} \times 7 = 56$

11)  $45 : 9 = \underline{\quad}$   
 $\underline{\quad} \times 9 = 45$

12)  $6 : 6 = \underline{\quad}$   
 $\underline{\quad} \times 6 = 6$

13)  $14 : 7 = \underline{\quad}$   
 $\underline{\quad} \times 7 = 14$

14)  $48 : 8 = \underline{\quad}$   
 $\underline{\quad} \times 8 = 48$

15)  $24 : 3 = \underline{\quad}$   
 $\underline{\quad} \times 3 = 24$

16)  $28 : 7 = \underline{\quad}$   
 $\underline{\quad} \times 7 = 28$

17)  $12 : 6 = \underline{\quad}$   
 $\underline{\quad} \times 6 = 12$

18)  $5 : 1 = \underline{\quad}$   
 $\underline{\quad} \times 1 = 5$

19)  $54 : 6 = \underline{\quad}$   
 $\underline{\quad} \times 6 = 54$

20)  $45 : 5 = \underline{\quad}$   
 $\underline{\quad} \times 5 = 45$

**Risposte**Es. **9** \_\_\_\_\_
