

Usa lo schema per mostrare come si dividono una frazione e un numero intero.

$$\frac{1}{3} \div 4 = ?$$

Dividilo in 3 parti e riempi una parte.

Poi dividi  $\frac{1}{3}$  in 4 parti.

Per calcolare la dimensione di ogni parte rispetto al tutto, dividi il tutto in 4 gruppi.

Per risolvere, inizia con l'intero.

Adesso puoi vedere le dimensioni di  $\frac{1}{3}$ .

Questo mostra la dimensione di ogni parte.

Ogni parte è  $\frac{1}{12}$   $\frac{1}{12}$  dell'intero.  
Oppure  $\frac{1}{3} : 4 = \frac{1}{12}$
