

Usa lo schema per mostrare come si dividono una frazione e un numero intero.

$$\frac{1}{3} \div 4 = ?$$

Dividilo in 3 parti e riempi una parte.

Poi dividi $\frac{1}{3}$ in 4 parti.

Per calcolare la dimensione di ogni parte rispetto al tutto, dividi il tutto in 4 gruppi.

Per risolvere, inizia con l'intero.

Adesso puoi vedere le dimensioni di $\frac{1}{3}$.

Questo mostra la dimensione di ogni parte.

Ogni parte è $\frac{1}{12}$ $\frac{1}{12}$ dell'intero.
Oppure $\frac{1}{3} : 4 = \frac{1}{12}$
