

Usa le linee numerate per rispondere alle domande.

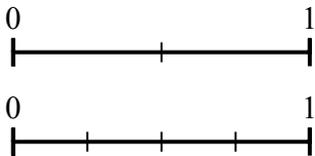

- 1) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{8}$?

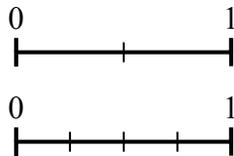

- 2) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{4}$?

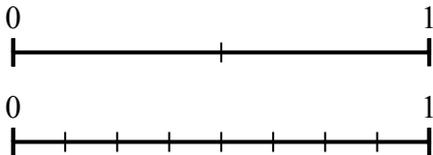

- 3) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

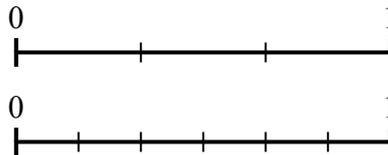

- 4) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

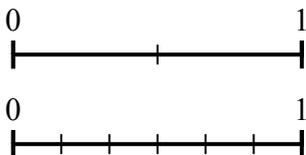

- 5) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

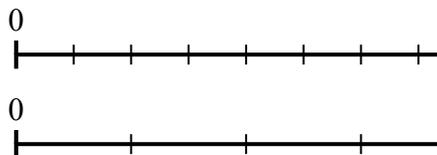

- 6) Usando la linea seguente, qual'è la frazione equivalente a $\frac{3}{3}$?

- 7) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

- 8) Usando la linea seguente, qual'è la frazione equivalente a $\frac{6}{8}$?

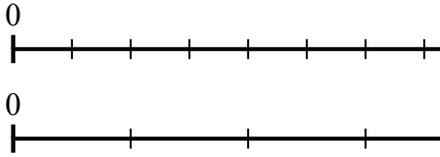

**Risposte**

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

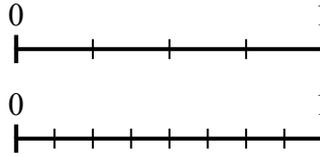

Usa le linee numerate per rispondere alle domande.

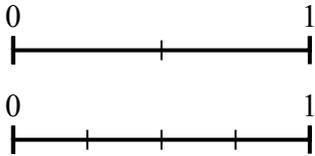

- 1) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{8}$?

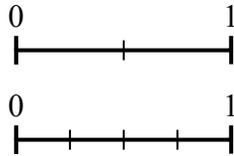

- 2) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{4}$?

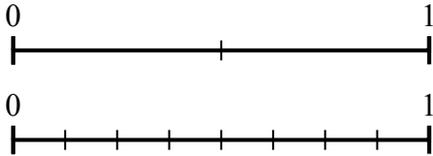

- 3) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

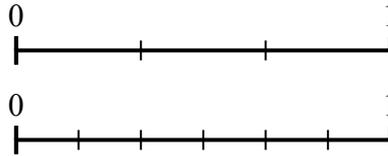

- 4) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

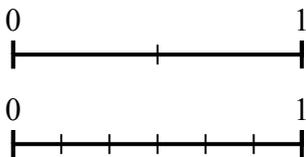

- 5) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

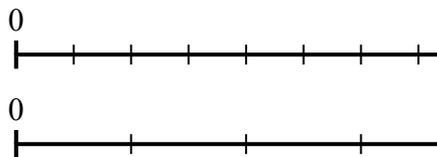

- 6) Usando la linea seguente, qual'è la frazione equivalente a $\frac{3}{3}$?

- 7) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

- 8) Usando la linea seguente, qual'è la frazione equivalente a $\frac{6}{8}$?

**Risposte**

1. $\frac{2}{4}$
2. $\frac{8}{8}$
3. $\frac{2}{4}$
4. $\frac{4}{4}$
5. $\frac{8}{8}$
6. $\frac{6}{6}$
7. $\frac{3}{6}$
8. $\frac{3}{4}$
