

Usa le linee numerate per rispondere alle domande.

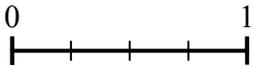

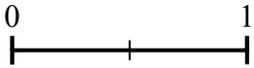

- 1) Usando la linea seguente, qual'è la frazione equivalente a $\frac{6}{6}$?

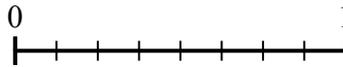

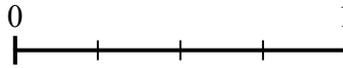

- 2) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{6}$?

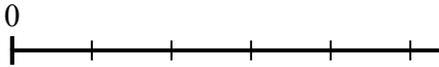

- 3) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

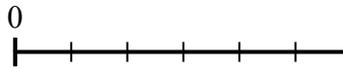

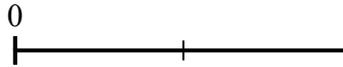

- 4) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{4}$?

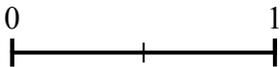

- 5) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{6}$?

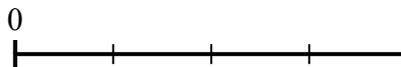

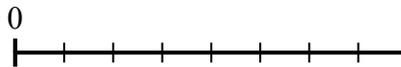

- 6) Usando la linea seguente, qual'è la frazione equivalente a $\frac{0}{2}$?

- 7) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

- 8) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{8}$?

**Risposte**

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

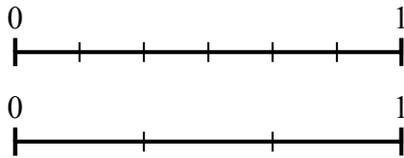

7. _____

8. _____

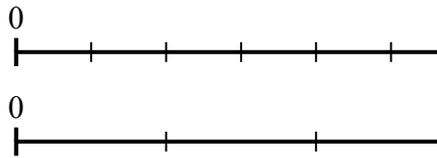

Usa le linee numerate per rispondere alle domande.

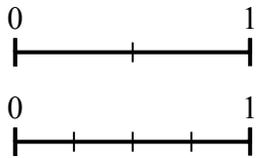

- 1) Usando la linea seguente, qual'è la frazione equivalente a $\frac{6}{6}$?

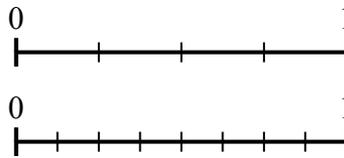

- 2) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{6}$?

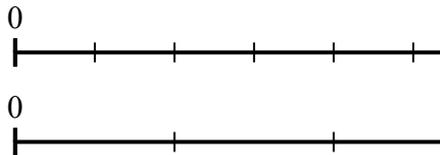

- 3) Usando la linea seguente, qual'è la frazione equivalente a $\frac{1}{2}$?

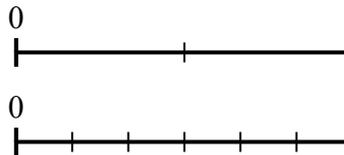

- 4) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{4}$?

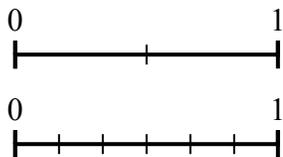

- 5) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{6}$?

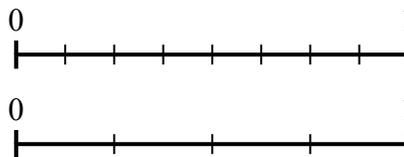

- 6) Usando la linea seguente, qual'è la frazione equivalente a $\frac{0}{2}$?

- 7) Usando la linea seguente, qual'è la frazione equivalente a $\frac{2}{2}$?

- 8) Usando la linea seguente, qual'è la frazione equivalente a $\frac{4}{8}$?

**Risposte**

1. $\frac{3}{3}$
2. $\frac{2}{3}$
3. $\frac{2}{4}$
4. $\frac{8}{8}$
5. $\frac{1}{3}$
6. $\frac{0}{6}$
7. $\frac{6}{6}$
8. $\frac{2}{4}$
