

Usa il metodo grafico per risolvere ogni operazione.

$$\frac{2}{4} \times 3 =$$

Un metodo per risolvere le moltiplicazioni tra le frazioni è di considerarla un'addizione. Per esempio il problema qui indicato è uguale a:

$$\frac{2}{4} + \frac{2}{4} + \frac{2}{4}$$

$$\frac{2}{4} \times 3 =$$

Se coloriamo $\frac{2}{4}$ per tre volte possiamo vedere la rappresentazione grafica del problema.

$$\frac{2}{4} \times 3 = 1 \frac{2}{4}$$

oppo aver colorato possiamo vedere perché tre volte $\frac{2}{4}$ è uguale a 1 intero e $\frac{2}{4}$.
