

Usa le linee numerate per rispondere alle domande.

Risposte

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{2}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{8}{8}$?

- 4) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{8}{4}$?

- 5) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{0}{2}$?

- 6) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{4}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{3}{6}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{3}$?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

Usa le linee numerate per rispondere alle domande.

- 1) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{2}$?

- 2) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{4}{8}$?

- 3) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{8}{8}$?

- 7) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{3}{6}$?

- 8) Secondo la linea numerica mostrata, qual è la frazione equivalente di $\frac{2}{3}$?

**Risposte**

1. $\frac{4}{4}$
2. $\frac{1}{2}$
3. $\frac{2}{2}$
4. $\frac{4}{4}$
5. $\frac{0}{6}$
6. $\frac{4}{8}$
7. $\frac{1}{2}$
8. $\frac{4}{6}$
