

Trova le frazioni equivalenti con la linea numerata Nome:

Usa le linee numerate per rispondere alle domande.

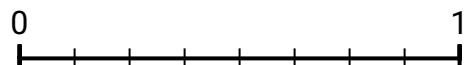

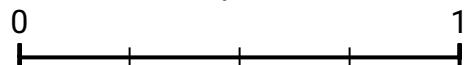

- 1) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{6}{10}$?

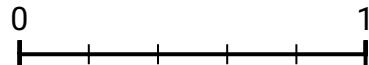

- 3) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{3}{4}$?

- 5) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{4}$?

- 7) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{2}{5}$?

1. _____

2. _____

3. _____

4. _____

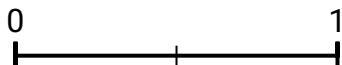

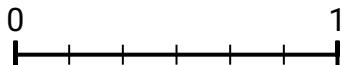

5. _____

6. _____

7. _____

8. _____

- 2) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{3}{6}$?

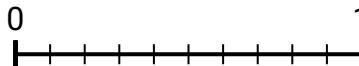

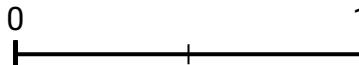

- 4) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{3}$?

- 6) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{4}{6}$?

- 8) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{2}$?

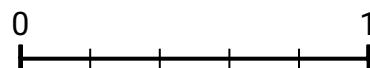

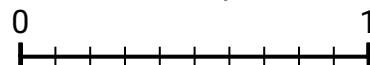

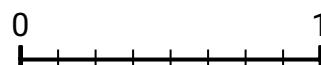

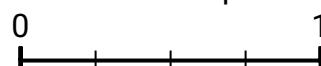

Trova le frazioni equivalenti con la linea numerata Nome: **Soluzioni**

Usa le linee numerate per rispondere alle domande.

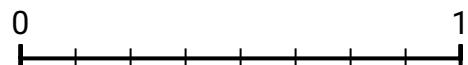

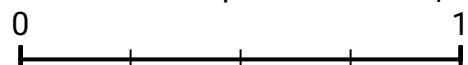

- 1) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{6}{10}$?

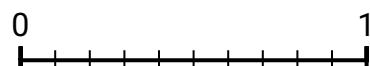

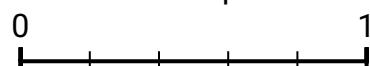

- 3) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{3}{4}$?

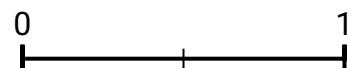

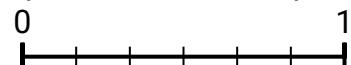

- 5) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{4}$?

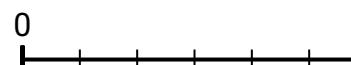

- 7) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{2}{5}$?

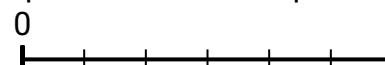

- 2) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{3}{6}$?

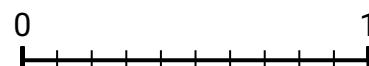

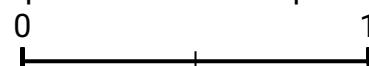

- 4) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{3}$?

- 6) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{4}{6}$?

- 8) Usando le linee dei numeri mostrate, qual è la frazione equivalente a $\frac{1}{2}$?

Risposte

1. $\frac{3}{5}$

2. $\frac{1}{2}$

3. $\frac{6}{8}$

4. $\frac{2}{6}$

5. $\frac{2}{8}$

6. $\frac{2}{3}$

7. $\frac{4}{10}$

8. $\frac{5}{10}$
